Stunning garden buildings designed and built in Canada

Cedar Gazebos

We have created a stunning collection of garden gazebos designed specifically to complement your hot tub.

The Garden Collection is our most desired open air gazebo line. The Garden I gazebo is specifically designed to accommodate a 7 foot Arctic Spas hot tub while the Garden II is for your 8 foot spa.

This exclusive design balances privacy with beauty in perfect harmony. The framing of the Garden gazebo is made of Grade A Kiln Dried Canadian Western Red Cedar stained with high quality Sikkens stain. The privacy panels are made with Super Lattice which is environmentally friendly and is 100 times more durable than traditional stapled cedar lattice and therefore will last as long as your new Arctic Spa

This Canadian manufactured hot tub gazebo utilizes high grade components and has many features. The roof is made of Durametal which is constructed from 29 gauge steel with baked on enamel. Durametal is virtually maintenance free and is lined with a wood ceiling for beauty and better sound absorption. Also there is a 3'x3' skydome to enhance sightlines to the night sky.

Garden I
The interior wall to wall dimensions are 250cm x 250cm. The exterior wall to wall dimensions are 259cm x 259cm. The roof dimensions are 300cm x 300cm. The overall height to the peak of the dome on the roof is 290cm.

Garden II
The interior wall to wall dimensions are 269 cm x 269 cm. The exterior wall to wall dimensions are 280 cm x 280 cm. The roof dimensions are 323cm x 323cm. The overall height to the peak of the dome on the roof is 304cm.

The Olympia Series is our northern alpine gazebo line. The Olympia 10x10 gazebo is a medium sized hot tub gazebo that accommodates a small table and chairs around a 7' x 7' square hot tub while the 10'x12' model is designed for 8' hot tubs. The range is completed by the stunning 10'x14 model.

This unique design was inspired by an artist's studio in the south of France. The Olympia features tinted transom style windows which provide cross-ventilation whilst maintaining security and privacy.

This Canadian manufactured hot tub gazebo utilizes high grade components and has many features. The roof is made of Durametal which is constructed from 29 gauge steel with baked on enamel. Durametal is virtually maintenance free and is lined with a wood ceiling for beauty and better sound absorption. Also there is a large skydome to enhance sightlines to the night sky. The tinted acrylic privacy windows are framed with kiln dried Canadian Red Cedar and are lockable. The entrance consists of 2 large French doors with unique accented hardware.

The body of the Olympia gazebo is made of Grade A Kiln Dried Canadian Western Red Cedar and stained with high quality Sikkens stain.

The 10'X10' model features a 1.22m x 1.22m skydome. The interior wall to wall dimensions are 296 cm x 296 cm. The exterior wall to wall dimensions are 314 cm x 314 cm. The roof dimensions are 356 cm x 356 cm.

The larger 12'x10' model has a huge 1.22m x 1.83m skydome for real stargazing.

The interior wall to wall dimensions are 296cm x 357 cm. The exterior wall to wall dimensions are 314 cm x 366 cm. The roof dimensions are 356cm x 417cm.

The 12'x14' model features interior wall dimensions of 296 cm x 297 cm and exterior dimensions of 314 cm x 436 cm
